PROJECTS

- **ContractFlow System**

Technologies: Django

Developed a web-based contract management system that allows users to create, manage, and track contracts efficiently.

- **Portfolio Website**

Technologies: HTML, CSS, JavaScript

Built a responsive personal portfolio website to showcase projects and technical skills.

- **OSI Model Interactive Guide**

Technologies: Django

Created an interactive web application that helps students learn the OSI networking model with structured explanations.

- **Student Record Management System**

Technologies: C++

Developed a console-based application that manages student records using a linked list data structure.

- **Quiz Web Application**

Technologies: React.js

Developed a quiz platform that allows users to answer questions and receive instant results.
